The registration is binding.

CONDITIONS OF PARTICIPATION:

Children aged 0 to twelve years, of EXPO REAL fair participants are eligible to participate.

PROGRAM

What can your children expect during these exciting days?

PROGRAM FOR CHILDREN AGED ZERO TO THREE YEARS

FellWell4Kidz: Toddler childcare area

The FellWell4Kidz academy offers relaxation, retreat and loving care for the smallest of the little fair participant. Comfortable corners, picture books and various age appropriate toys welcome the little ones and enable them to contact our loving childcare.

PROGRAM FOR CHILDREN AGED FOUR TO 12 YEARS.

During the several days of the childcare service our goal is to use the „Kids @ EXPOREAL 2025“ childcare service program to bring the terms of conception and development as well as implementation through to marketing, operation and utilisation of real estate, closer to your children and to bring them to life in a loving and age-appropriate way. Analogous to our co-constructivist approach of pedagogy, your children shape their experiences on the individual Project4Kidz based on a wide range of suggestions from the Care4Kidz childcarer.

FURTHER INFORMATION:

For more information, please refer to the childcare program website: www.events4kidz.com/exporeal-2025 and the password: EXPOREAL2025.

16:00 – 19:00	MoveandRelax4kidz
19:00	PickUp4Kidz

PROGRAM

Monday, 6th of October 2025

Welcome to the childcare program and immerse yourself in the world of your own creativity

Project4Kidz: MyDreamHouse

Get away from everyday life and immerse yourself again in your own creativity. Creative problem-solving skills and curiosity are innate in everyone, but they atrophy over the course of life like an untrained muscle if they aren't continually challenged. Although creative, self-determined action demonstrates, develops, and trains children and young people's self-efficacy, tasks and challenges of this kind are far too neglected in children's everyday lives.

Of course, today's theme is: My Dream House. We'll browse through the search and non-fiction book together: "Come with us, let's build a house," and then we'll get started with all our creativity and with the help of cardboard boxes and the Care4Kidz material kit.

In the afternoon, numerous guided movement activities and free play time are planned.

Project4Kidz: My Dream Hotel or Shopping Center of the Future

We live in houses, we spend our vacations in houses, we go shopping in houses, and we will continue to do so in the future. But how will these houses change in the future? Thanks to the Pixi book "Erik and the Magic House," we'll first learn about the features of a smart home today. Afterwards, we'll get really creative again. We'll design our own dream hotel or shopping center of the future on an XXL continuous sheet of paper and dream ourselves into the future. Of course, we'll "guide" the other participating children through our future project and share all our big and small ideas for the future.

Thanks to self-made VR headsets, we'll also venture into the imaginary world of the real estate industry of the future and encounter digital viewing tours, ultra-modern dream homes, or the occasional house from a bygone era.

Welcome to the Ice Cream Stick Wooden House Factory

Project4Kidz: The Ice Cream Stick Wooden House Factory

Today we have the exciting opportunity to build a wooden house out of ice cream sticks. This creative project promoted teamwork, age-appropriate mathematical thinking, and manual dexterity.

First, we gathered our ideas and drew our house. We then considered how many ice cream sticks we would need, and we'll see if we were right in the end.

Now it's time to start building: By gluing the ice cream sticks together, starting with the foundation and the individual walls. By gluing diagonally, we achieved greater stability, one of our learning experiences today. After construction, we creatively decorated our house with paints, paper windows, and small decorations.

Finally, we proudly presented our work to our parents. The project taught us valuable lessons about collaboration and planning while we made unforgettable memories.
